## FOR IMMEDIATE RELEASE

### NEW AUTOMOTIVE LIFT STANDARD

The Safety Standard for Automotive Lift Construction, Testing and Validation, ANSI/ALI ALCTV-2006, was recently approved by the American National Standards Institute (ANSI). This new standard becomes effective on November 4, 2007 and will replace ANSI/ALI ALCTV-1998, providing time for manufacturers of lifts to conform by having their lift models tested and certified. In the meantime, the current standard (ANSI/ALI ALCTV-1998) remains effective.

Visit the Institute's website at [www.autolift.org](http://www.autolift.org) for information on how to purchase this and other ANSI approved standards as well several other safety materials offered in support of ALI's mission of promoting the safe design, construction, installation and use of automotive lift products.
