FOR IMMEDIATE RELEASE

AUTOMOTIVE LIFT INSTITUTE OFFERS UPDATED VEHICLE LIFTING POINTS GUIDE for FRAME-ENGAGING LIFTS

VEHICLE LIFTING POINTS: 2011 EDITION

Cortland N.Y. – January 5, 2011 – The Automotive Lift Institute, Inc. (ALI) announces the availability of the 2011 edition of ALI’s “VEHICLE LIFTING POINTS for FRAME ENGAGING LIFTS”.

This updated guide is a quick-reference single-source manual for lifting point information as recommended by the vehicle manufacturers. The 60 page Lifting Point Guide (LP-G) for domestic and imported cars and light trucks uses over 200 undercarriage images to cover the most recent 20 model years.

For this new edition, the 2011 model year vehicles were added, some older images were revised, and additional cautionary notes were provided in an effort to clarify pick-up point locations for shop owners, technicians and other LP-Guide users. The Automotive Lift Institute (ALI) sponsors this Guide annually as an industry service, utilizing data furnished exclusively for ALI by Chek-Chart Products, MOTOR Information Systems. Many proactive companies and franchises now incorporate ALI’s LP-Guide and other safety materials as an integral component of their overall employee safety and training program.

Visit ALI’s website www.autolift.org to order this updated guide or for information on other safety materials and standards sponsored by the lift manufacturers who support ALI’s mission of promoting the safe design, construction, installation and use of automotive lift products.
